DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 7, 18, 20, 21, 52, 53, 56, 58, 60 and 61 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Kunugi, 2002/0022440, please refer to figures 5 and 6 and their descriptions.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3723

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 19, 22, 54, 57 and 59 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kunugi, '440 in view of Quek, 6,439,977. '440 discloses moving the nozzles during planarization relative to the nozzle support, but does not disclose that that movement is rotational. '977, in a CMP apparatus, figure 2, teaches rotating a solution dispensing nozzle relative to its support. It would have been obvious to one of ordinary skill in the art to have provided '440 with the rotating nozzle of '977, to allow quick and even distribution of the solution across the pad, see '977, Summary of the Invention.

Response to Arguments

5. Applicant's arguments, see pages 11 and 12 of applicant's arguments, filed 24 March 2006, with respect to the rejection over Mok, have been fully considered and are persuasive. The rejection of claims 8, 19 and 22 over Mok has been withdrawn. Further, the rejection over Togawa et al has been overcome by applicant's amendment.
